

caCURE

*A new caBIG[®] application for
Collecting Patient Reported Health Data*

June 28, 2010

Bill Tulske
CEO
HealthCare IT, Inc.

Agenda:

- The Health of Women Study
- Initial Launch
- The Data
- Findings from the Initial Launch
- Next Steps

The Health of Women Study (HOW)

- **Purpose:** Develop a new model research
 - First-ever, large online cohort study
 - Examine causes, treatment, prevention of breast cancer,
 - Identify predictors of survival and consequences of therapy
 - Designed to study up to one million women.
- **Initial Launch:**
 - Directed to the current Love/Avon Army of Women
 - ~30,000 women completed the first module to date
- **Collaborators:**
 - The Dr. Susan Love Research Foundation,
 - The Beckman Research Institute (COH),
 - BIG Health Consortium™
- **Tooling:** caBIG® tools for secure online submission/handling of data

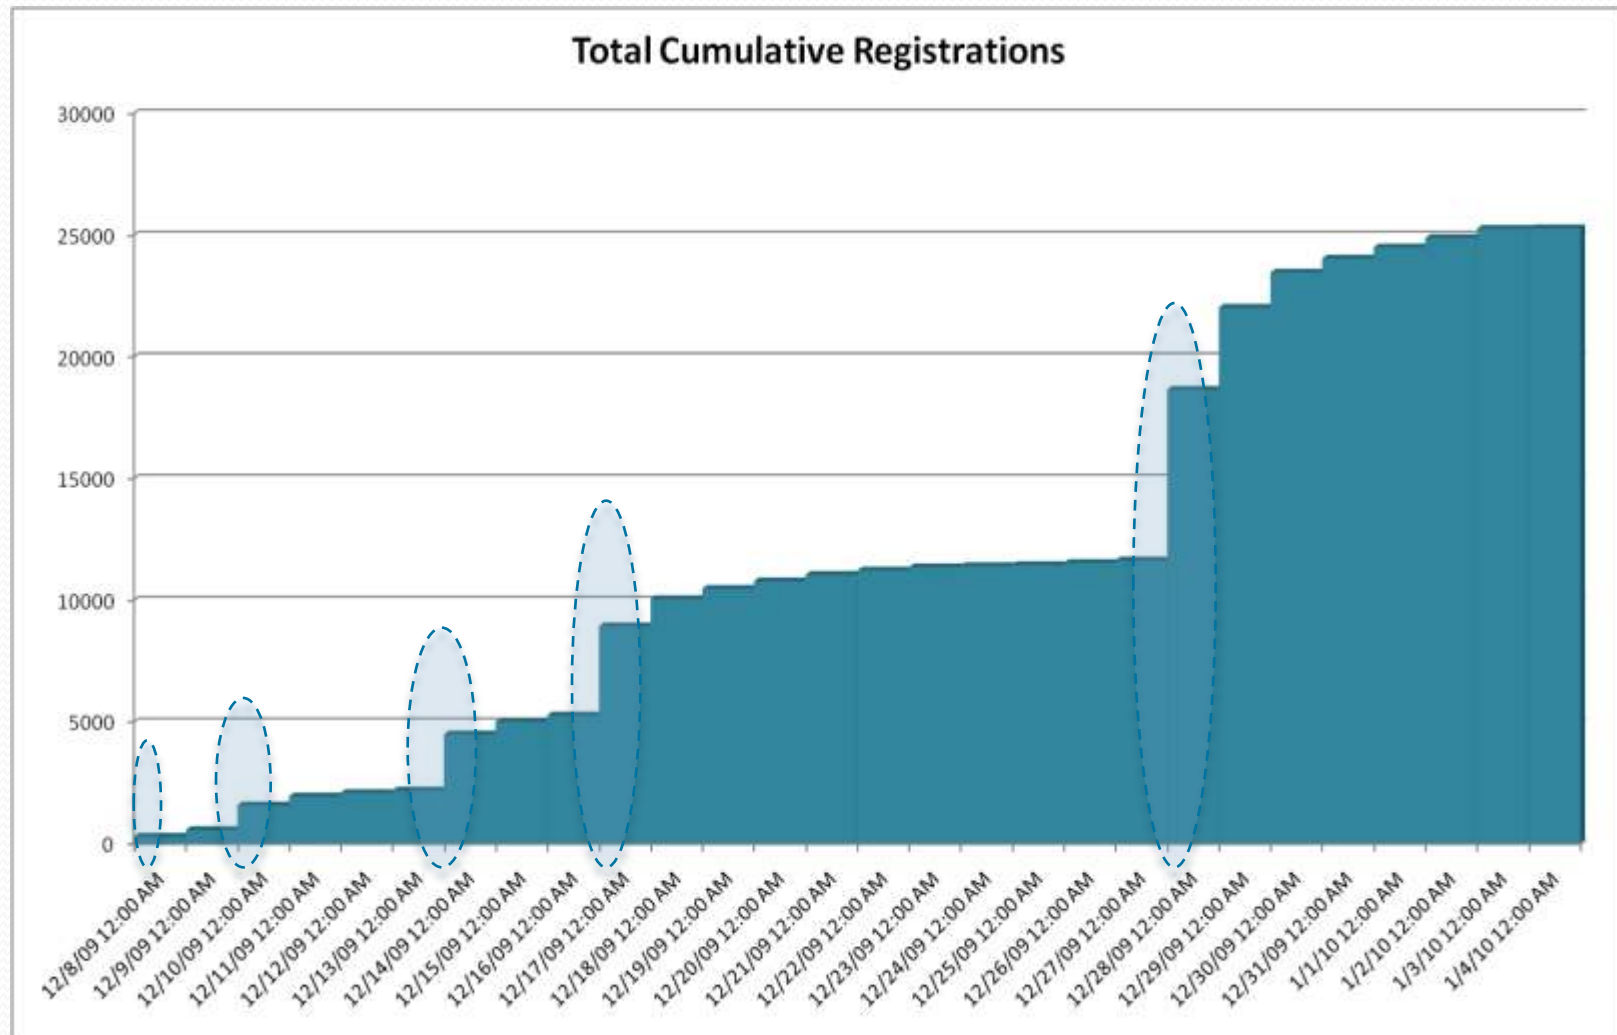

Module One Data:

175 questions arranged in 4 forms

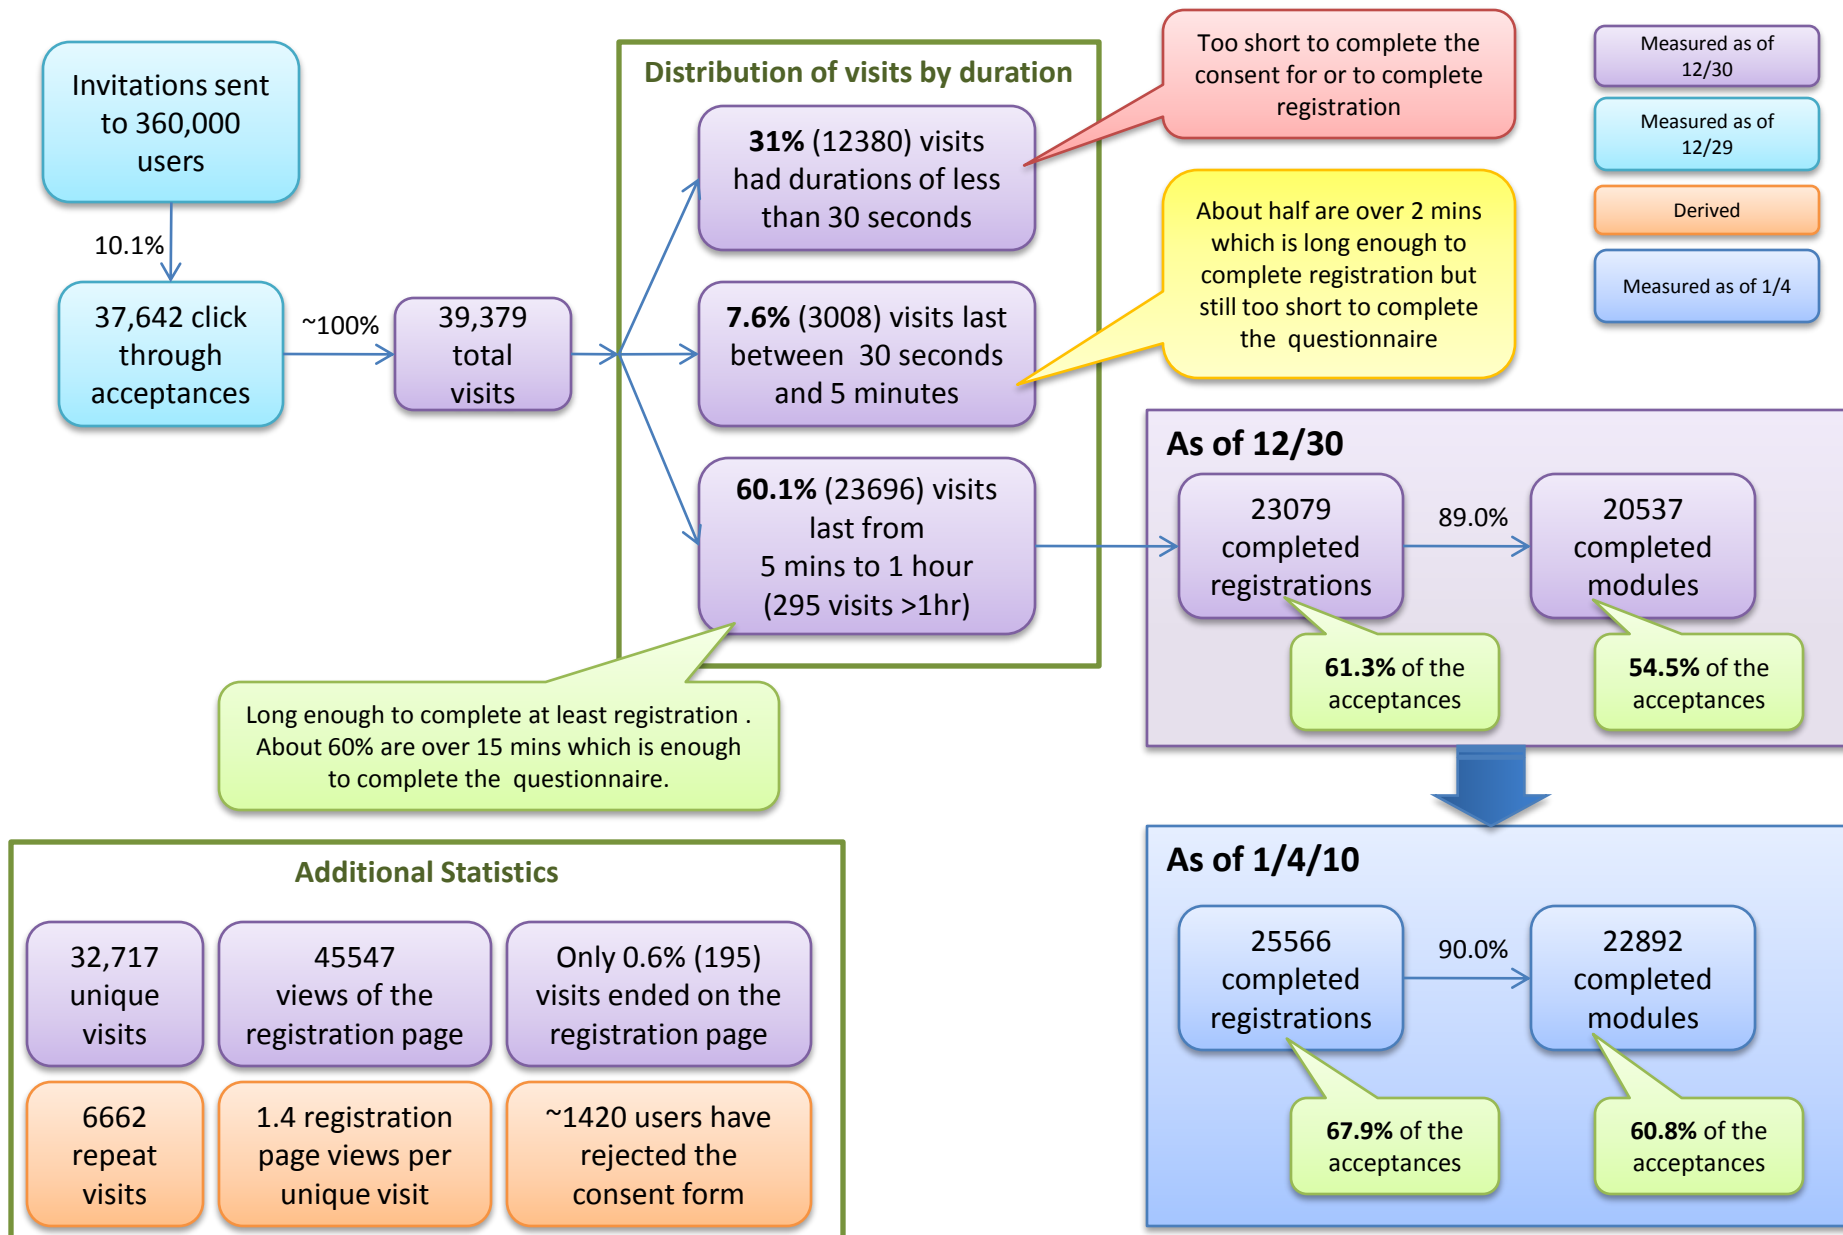

- **About Me:** gender, occupation, education, ethnicity
- **My Reproductive Health:** menstruation, birth control, fertility, pregnancy and nursing, menopause, hormonal therapies
- **My Health As Of Today:** general health and activity, height, weight, alcohol and tobacco usage, diet, sexual orientation and activity, health complaints, herbal remedies
- **My Cancer:** diagnoses and treatment

All data elements in the caDSR under caMATCH category

Participants invited in 5 groups

HOW study website flow analysis

Findings from Phase One / Initial Launch

- We can predict required system capacity from well characterized arrival distributions
- The form technology needs complete overhaul to support release of new modules over time
- Data persistence must be revamped to allow for dynamic extensibility
- Data analytics needs to be reengineered to evolve with the forms and data

Phase 2 - caCURE

- Form Builder
 - Creates new modules, forms and questions
 - Uses Xforms for form representation
 - Supports edit, approve, pilot, publish life cycle
- Form Runner
 - Integrates easily with popular open source CMS systems
 - Persists data as JSON or XML
- Data Analytics
 - Allows declarative presentation semantics
 - Provides graphical analysis of selected data

caCURE Form Builder: Creating modules and forms

The caCURE Form Builder allows the user to create **modules** . . .

Text: Value:

caCURE question editor allows the user to specify:

- various answer types,
- the data encoding for answers,
- 'learn more' text,
- simple and complex skip patterns,

Questions can be associated to a formal data element taxonomy such as caDSR.

Forms are published as XForms

The screenshot displays the 'The Health of Women Study (HOW)' website. The header includes navigation links: 'About HOW', 'Join HOW', 'About Us', 'FAQ', 'Privacy Policy', and 'My Account'. Below these are links for 'Logout', 'Contact Us', 'Army of Women', and 'Help'. The 'army of women' logo is on the left, with the tagline 'LOVE/AVON Going Beyond a Cure'. The main title 'The Health of Women Study (HOW)' is in large pink letters. A secondary navigation bar has 'About Me' (highlighted) and 'My Health as of Today'. The 'ABOUT ME' form is enclosed in a dashed green border. It features a sidebar with 'About Me' and 'My Health as of Today' options. The form fields include: First Name (required), Middle Initial, Last Name (required), Street Address (required), City (required), State (dropdown menu), Zip (required), Phone Number (required, with format xxx-xxx-xxxx), Email Address (with example test300@test.com), Fax Number (optional, with format xxx-xxx-xxxx), Date of Birth (required, with format mm/dd/yyyy), and Sex (radio buttons for Female and Male). A 'View / Print' link is in the top right of the form area.
